www.leadontimberframe.com

We at Leadon Timber Frame have grown and matured as a company of individuals dedicated to the design and construction of crafted timber frame structures. We are committed to ensuring that our clients' requirements are fulfilled in all areas where satisfaction, value and quality become standard.

We are a family owned business and take great pride in our work, we at Leadon Timber Frame have over 10 years experience in the manufacturing and erection of Timber Structures. We manufacture a variety of structures ranging from a single domestic dwellings, multi storey apartment blocks, nursing homes, modular buildings etc.

We are based at 79 Dunnamore Road, Cookstown operating from our new purpose built factory, having invested in the latest automated manufacturing equipment available to help meet the level of demand for our product, this allows precision manufacturing and maintaining a high level of quality that our company has become renowned for.

We also like to work closely with our clients on a personal basis, therefore we can give them the quality and attention that they deserve. We are an ISO 9001: and NSAI (National Standards Authority of Ireland) Timber Manufacturers Quality Scheme Standards accredited company. Our raw materials both timber and wood based are certified to FSC and PEFC standards. We offer our clients supply only or Supply and Erect Timber Frame packages, We also manufacture wood web joists and offer SIP panel construction, insulation, plaster-boarding etc. it's your choice.

Timber frame today is one of the most technically advanced methods of Construction. Over 70% of the world's population live in timber frame buildings; in countries such as America, Sweden, Norway and Scotland the development of timber frame is now an accepted occurrence.

SPEED OF CONSTRUCTION

For a fast and efficient method of construction timber frame is the answer, off-site manufacturing means that the timber frame has been made in a controlled environment guaranteeing consistency and product quality, once the readymade kit arrives on site it can be erected, roofed and the fitting of external door-sets and windows can have the building completely sealed within days rather than months. This allows all other trades to commence work immediately, therefore overall construction time is greatly reduced resulting in reduced onsite costs.

ENERGY EFFICIENCY

As we are all only too aware, energy costs of fossil fuels have spiralled upwards, timber frame offers reduced heating costs with many variations of insulation, heat recovery and air tight system packages available to comply with all code levels. We at Leadon Timber Frame strive to make it our business in offering cost efficient energy packages.

WHERE DO I GO FROM HERE?

Whether you are a selfbuilder or a developer it is quite simple:

- Forward copy plans to the address enclosed or email direct
- In return we will send you a quotation

Can you afford not to use Leadon Timber Frame?
